

We value leadership that produces results, but also retains our talented staff and keep them motivated to do their absolute best. Here we bring this newsletter to share our latest updates and new achievements.

Digital Transformation in New Normal

The New Normal has forced the organization to create the bridge for digital transformation and shift from physical to digital interaction with customers to remote working. It provides an unparallel opportunity for all industries, and total reinvention of products, services and experience being delivered to the market. It also helps to core business functions, such as finance, healthcare, manufacturing, and HR, to move from manual process to automate key areas to enable leaders to focus on wider business opportunities.

Digital transformation is the integration of digital technologies into all fields of the organization, which leads to fundamental changes in the operation of the company and the value they deliver to their clients. In this new reality, we have been able to update our digital strategy and provide customers with innovative and extremely valuable experiences. We continually offer frontline services to adapt rapidly to the ambition, efficiency, and technological capabilities of the company to fulfil their ambition. We are easily able to access the data to deliver new strategic insight and services on a regular basis, it keeps company transformation and business strategy aligned.

New Wins

Hard team work during these tough Covid times

Successfully implemented the Privileged Access Management Solution for a large Wealth Management Company in India to protect against the accidental or deliberate misuse of privileged access by streamlining the authorization and monitoring of privileged users.

We have Successfully built a team for one of the largest American retail company in India in the niche areas of AI, SAP, HCM Fusion, and Kronos. It is worldwide premier supply chain organization with reputation for innovation, speed efficiency and quality.

03

Successfully implemented multiple security solutions like Rights Mgmt, Priviledge Mgmt & Database Access Mgmt for a large credit card company in Saudi Arabia to protect the critical data and customer information's and meet the SAMA regulations and compliance with PCI and ISO 27001:2013 standards.

Big win for Skillmine for a Strategic Go-To-Market Alliance with Grant Thornton, which will bring together the deep technical security expertise, threat intelligence, and consulting practices to offer greater Cyber Protection to businesses in Saudi Arabia.

We have successfully deployed the HR Application on 2716+ stores spread across UK with over 5000+ deployment. Delivered encryption changes to 301 stores in phased manner & also performing monthly patching up windows security updates across all servers distributed across multiple environments inclusive of Tesco private cloud. We are also working on Azure DevOps services to enhance the process & prepare for Upcoming TAM Cutover.

What's New?

Selfende Overview Comment Overview Comment Comment Overview Comment Comment

1. IAM AUTH

Digital Smart Services for CKYC & Identity-Access Management

Skill-Mine Auth is a flexible, drop-in solution to add authentication and authorization services to your applications (with OAUTH2, OPENID CONNECT, SAML, AD, LDAP, Classical Login, Password Less auth, Social Logins and Enterprise providers). One can connect any application to Skill-Mine Auth and define the identity providers you want to use (how you want your users to log in). Skill-Mine Auth will verify their identity and send the required information back to the app.

2. New Software Factory

We continuously adapting new software that enable to serve and interact with customer better. This time we have new technology on Artificial Intelligence with Machine Learning in Chat Bots. Which help users to self-service, answer the questions, access the orders, and make appointments. It is important to introduce new technology to our viewers to be in a flow, we bring Tensorflow and Dialogflow

Tensorflow

TensorFlow is an open source library for numerical computation and large-scale machine learning. It allows developers to create dataflow graphs—structures that describe how data moves through a graph, or a series of processing nodes. It can train and run deep neural networks for handwritten digit classification, image recognition, word embeddings, recurrent neural networks, sequence-to-sequence models for machine translation, natural language processing, and PDE (partial differential equation) based simulations.

Dialogflow

Dialogflow is a natural language understanding platform that makes it easy to design and integrate a conversational user interface into your mobile app, web application, device, bot and interactive voice response system.

3. Our New Office to Facilitate Growth

Achievements do not look back, it always opens the way to success, stepping toward success We are excited to announce the opening of our New Office in New York. We are all set to Explore!

4. Scaling our Automation Journey

Our new business partner "Automation Anywhere" we truly believe this partnership will increase the business capability and our customer across the world.

We are pleased to announce our partnership with RPA leader Automation Anywhere to leverage RPA, driving improved results for our customers across the board.

Introducing Vikas Tripathi

Skillmine Inseed Program

The objective of this program is to incubate a talented pool of resources, who would be fully up-skilled to take up any challenging assignments with ongoing projects. With this program, Skillmine delivers freshly cooked talent that contributes to our customer's business. Keeping this program in mind, we did a program for Sony and ICICI.

SONY

The talent aquisition HR & Skillmine Delivery team successfully delivered Information Security based capability programme for 2020 for Sony.

The INSEED Program for Information Security was successfully delived for SONY, covering topics like McAfee, Splunk & other areas of Information Security.

ICICI

INSEED program for ICICI IT command center was successful, giving focus around Infrastructure Aplication and Incident Manegement support area.

A new program for INSEED for the entire network engineering and support is currently work in progress to be delivered to ICICI by December 2020.
