Information Security Statutory Compliance

Assurance of conformance to Statutory & Compliance regulations as a shining example for your end Customers to be assured of reliability for your Business outcomes. Skillmine will assure compliance to PCI, ISO, SAS, HIPAA, SOX, ITIL, etc.

WHY?

• **Threat of legal liability**

Organizations and software vendors are being held to a higher degree of accountability for security, if not in the count room, by their customers.

• **Business partners and stakeholders demanding security**

Organizations are challenged to prove they are managing security to a level that will satisfy their business partners and stakeholders.

• **Proliferation of standards, regulations and legislation**

Organizations face complex requirements to comply with a myriad regulations.

How?

• Introduction to End User about Security Awareness
